

# REASONS TRADESMEN IS A BETTER TRAILER

**1**

### ATTITUDE

It all starts with the right attitude. Our seasoned engineer and design team wakes up every day with the goal of making our trailers better. Bravo trailers work harder, look better and will outlast other brands.

**2**

### BEEFY TUBE FRAMES

All Bravo Tradesmen trailers have tube main frames that are stronger, straighter and tow better. A combination of Bravo's tube main frame, walls, top rail and front end leads to the strongest trailer on the market today.

**3**

### TUBE REAR ENDS

Tradesmen trailers feature all tube rear end structures. This is a key reason our trailers can stand up to the daily abuse of carrying your equipment. This, in addition to our tube frames and front A-frames, leads to true commercial quality.

**4**

### 16" O.C. FLOORS WALL CEILING

All Tradesmen trailers come with 16" O.C. floor, wall and ceiling tube members. We build them tough. Do not confuse these with other enclosed trailers not specifically built for construction use.

**5**

### REINFORCED A-FRAMES

Reinforced A-frames combined with the vertical tubes in all of our front ends make Bravo trailers the strongest in the business. Reinforced A-frames equal stronger, safer and longer lasting trailers.

**6**

### SIDEWALL STRUCTURE

We've learned contractors need to hang tools, shelving, and equipment on their interior sidewalls. All Tradesmen trailers have beefed up sidewall structure to carry the load. We will not let you down!

**7**

### BEEFY DOORS

All Tradesmen trailers have Heavy Duty side and double rear doors featuring either an aluminum or steel internal framing. In addition, they have bar locks, slam locks (on side doors) with nylon protection and aluminum liners.

**8**

### PROTECTED WIRING

Bravo Trailers' quality in-frame wiring offers much more protection from road debris and weather. Bravo's protected wiring is the best in the industry. We will never leave you stranded.

**9**

### ROCK GUARD COATING

All Tradesmen A-Frames and rear crossmembers are prepped and finished with Bravo's tough Rock Guard coating for durability. Painted surfaces are prepped and primed while under frame areas get undercoating.

**10**

### STEEL BACKERS

All exterior side wall lighting and door hold backs are mounted in a steel backer. The also act as a gusset connecting the front and rear to the side walls for a more commercial-grade frame.

## FIVE MORE STANDARD TRADESMEN FEATURES FOR A COMMERCIAL QUALITY PRODUCT!

# 2X THE LIFE

**1**

### TWICE THE LIFE

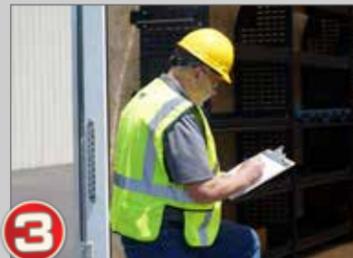

With Tradesmen's beefy frame and commercial quality features you can expect twice the life of other recreational based enclosed trailers. Not only will they last longer they look better too making a great rolling billboard for your business!

**2**

### THEY TOW BETTER

Our years of experience and thousands of miles towing trailers have allowed us to tweak our designs for better and safer towing. You can rest assured your Tradesmen trailer will tow great because we have tested them already!

**3**

### FIELD TESTED

Our trailers work! We field test every model and option to make sure they won't let you down. The unbeatable combination of Bravo's years of experience and testing make these the best enclosed work trailers on the market.

**4**

### OPTIONS GALORE

Listening to our customers leads us to better options that work! Our options are engineered in, not added on. Working with our design team, you can create the perfect trailer to make your business more efficient and successful.

**5**

### CUSTOMER SERVICE

No other trailer manufacturer will address your needs as quickly or fairly as Bravo. We have the parts and expertise to keep you on the road. We believe that thrilled customers are our greatest asset!
