

REASONS BRUTE IS A BETTER TRAILER

1

ATTITUDE

It all starts with the right attitude. Our seasoned engineer and design team wakes up every day with the goal of making our trailers better. Bravo trailers work harder, look better and will outlast other brands.

2

BEEFY TUBE FRAMES

All Bravo Brute trailers have tube main frames that are stronger, straighter and tow better. A combination of Bravos tube main frame, walls, top rail and front end leads to the strongest trailer on the market today.

3

TUBE REAR ENDS

Brute trailers feature all tube rear end structures. This is a key reason our trailers can stand up to the daily abuse of carrying light equipment. This in addition to our tube frames and super duty front a-frames lead to true commercial quality.

4

12" O.C. FLOORS

All Brute light equipment trailers come with 12" on center floor cross members standard. We build the tough! Don't confuse these trailers with other enclosed trailers that are not specifically built to carry your load.

5

REINFORCED A-FRAMES

Reinforced A frames combined with the vertical tubes in all of our front ends make Bravo trailers the strongest in the business. Reinforced A frames equal stronger, safer and longer lasting trailers.

6

WHEEL BOX STRUCTURE

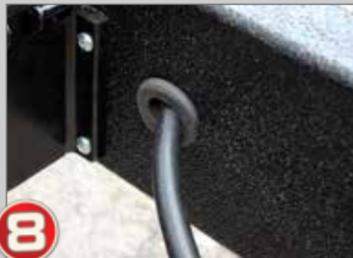

8.5' wide trailer sidewalls include 1"x3" tubing across the top of the wheel box connected to 1"x3" tubing running vertically from the side rail to the tube top rail at the front and rear of the wheel box.

7

INTERIOR PROTECTION

Brute trailer interiors are designed for the abuse of hauling construction equipment. All trailers feature interior 12" kickplate, galvanized steel rear corner protection and reinforced wheel boxes to stand up to years of abuse.

8

PROTECTED WIRING

Bravo Trailers' in-frame wiring offers much more protection from road debris and weather. Bravo's protected wiring is the best in the industry. We will never leave you stranded.

9

ROCKGUARD

All Brute A-Frames and rear cross-members are prepped and finished with Bravo's tough rockguard coating for durability. Painted surfaces are prepped and primed with under frame areas get Z Tech under coating.

10

BEEFY RAMP DOOR

All Brute rear ramp doors, flaps and transition flaps are built for the rigors of lite construction equipment. They feature rockguard coated steel runners for the unique stresses from short, narrow and hard tired equipment.

FIVE MORE STANDARD BRUTE FEATURES FOR A COMMERCIAL QUALITY PRODUCT!

1

THEY LOAD EASIER

Let us know what equipment you're hauling and our engineering team will make sure it fits and loads easily. With the wide variety of equipment available in today's market this is critical in guaranteeing your trailer works for you!

2

THEY TOW BETTER

Our years of experience and thousands of miles towing trailers have allowed us to tweak our designs for better and safer towing. You can rest assured your Brute trailer will tow great, we have tested them already!

3

FIELD TESTED

Our trailers work! We field test every model and option to make sure they won't let you down. The unbeatable combination of Bravo's years of experience and testing make these the best enclosed trailers on the market.

4

OPTIONS GALORE

Listening to our customers leads to better options that work! Our options are engineered in, not added on. Working with our design team you can create to perfect trailer to make your business more efficient.

5

CUSTOMER SERVICE

No other trailer manufacture will address your needs as quickly or fairly as Bravo. We have the parts and expertise to keep you on the road. Thrilled customers are our greatest asset!
